

## 1.3.1 REFRIGERATING OILS

### 1.3.2 LUBDECO SOLUBLE AGUA DURA

#### DESCRIPTION:

Soluble oil, produced with high quality basics, with a package of additives, bactericide germicide for avoiding corrosion, bad odor and, dermatitis in workmen handling machines and tools.

#### APPLICATIONS:

This is recommended in drilling, machining, milling, and threading operations and wherever a fluid for dissipating heat, acting as refrigerant, is needed.

Its mix depends on its use, which can vary a lot. This product can be mixed with portion up to 1 liter of oil with 20 liters of water.

#### PROPERTIES:

- Good protection against rust.
- Excellent refrigerant
- High protection against germicides
- Protection capacity
- Good emulsion stability

### 1.3.3 LUBDECO CORTACERO

Lubdeco Cortacero oils are lubricators especially designed to be used with metal cutting processes. They protect tools from premature erosion and lower their temperature during work.

These are made of high quality basic oil and extreme pressure, antioxidant, antirust and anti-erosion additives, which provide the required qualities to be used when cutting high and intermediate hard steel.
