

1.3.1 REFRIGERATING OILS

1.3.4 LUBDECO COOL FLUID SYNTHETIC

EL PRODUCTO LUBDECO COOL FLUID SYNTHTEC is a refrigerant fluid with synthetic base, produced with material guaranteeing its optimal performance, this can substitute, in many cases, mineral base quenching oil because of its great advantages.

These cutting fluids perform multiple works in machining as:

- Quick cooling
- Increasing and protecting cutting tools, during its average life.
- Do not cause the formation of bacteria or fungi.
- Control particle size in cutting tools, avoiding adhesion and striping.
- Maximum performance in operating machinery.

APPLICATIONS:

These are used in steel machinery, stainless steel, cast iron, grinding, engraving, blade cutting in window sash, milling and drilling.

USAGE RECOMMENDATIONS:

Use concentrations of 5, 8, 10 and 15% of the product according to its sternness.
