

1.6.1 GREASES FOR HIGH TEMPERATURES

1.6.5 FUNCAN 800 H.T.

DESCRIPTION:

Lubricating grease formulated of raw material especially selected and special compounds.

APPLICATION:

The application of this special grease can be considered as universal, since it comprises all of the application characteristics in:

Heavy equipments and intermittent high loads. The no leakage temperature characteristic makes this grease ideal for lubricating equipments subject to work constant temperatures up to 270° C and not constant temperatures up to 300° C.

PROPERTIES:

- Good mechanical stability
- Excellent protection from erosion
- Excellent protection from oxidation
- Very good water washing resistance
- Very good adhesion
- No leakage point
- High TIMKEN value
