

1.6.1 GREASES FOR HIGH TEMPERATURES

1.6.6 SPINAPLEX 2BMH

DESCRIPCION:

Adhesive lubricating grease incorporated to an additive package selected for providing higher properties to common greases added to micro-fine graphite and molybdenum disulphide providing an extra protection to the lubricating film.

PROPERTIES:

- It supports the high constant impact
- Resistant to stem and moisture
- Adhesion and antioxidant properties
- Thermal stability
- It can pumped at distance
- Free of additives with heavy and chlorinated metals

APPLICATION RANKS:

- Steel mills
- Mining
- Roads under construction
- Cement makers
- Chemical industry
- Forge and press

APPLICATION METHOD:

System with centralized lubrication or portable manual pumps.
