

1.7.1 GRAPHITE COMPOUNDS

1.7.13 LUBDECO A 787

This is a product, graphite base, in aqueous slurry. Product used for demoulding pieces from hot forges.

This has an excellent demoulding, lubricating and refrigerant power.

USAGE PROCEDURE

This is a concentrated product. For using this, it is necessary to dilute it with water in a quantity experimentally determined. As guide, we recommend a dilution of 1:5 (product : water)

APPLICATIONS:

This product must be applied by spreading it, using a manual or automatic equipment.

PHYSICAL PROPERTIES

Color	Black
Solid	Synthetic graphite
Density	1.0 g/cm ³ + /- -0.1
PH	9.0 to 12.0
Solid %	18% -20%
Appearance	Black viscous liquid
Viscosity	500 cps minimum
