

1.7.1 GRAPHITE COMPOUNDS

1.7.4 CHAIN LUBE TEC

GENERALITIES:

This a lubricant fluid made of not toxic raw material. Its food degree is to be applied in chains, sprockets, and mechanisms located in belt conveyors of food products introduced to furnaces where temperature is up to 300° C and constant efforts.

APPLICATIONS:

This can be applied by spreading it, using a pressure gun or a brush, on pieces to be lubricated, leaving a fine film. This does not required to be diluted, its application is direct.

PROPERTIES:

- Resilience and adhesion to metallic surface
- Stays stable at high temperatures
- Extends durability of lubrication
- Contains additive for supporting extreme pressure and reduce rust
- Not toxic, U.S.D.A. degree
- Biodegradable product

IMPORTANT NOTE:

Store this product in a fresh place and keep the container closed;

Presentation 41 kilos container.
