

2.1.1 LUBRICANTS FOR RAILROADS MECHANISMS

2.1.4 LUBDECO TRACK GREASE H.P.2

DESCRIPTION:

Lubricating grease formed based on lithium 12-hydroxisteraic, to stay stable under critical temperature and load conditions on long operation terms.

APPLICATION:

It can be used in couplings, worm gear box and exposed or mechanical gears subject to a severe impact. Lubdeco track grease hp-2 has a lubricating film imparting selected virgin oils with high viscosity.

ADVANTAGES:

- Adhering lubricating film
- Thermal stability
- Corrosion resistant
- Extreme pressure
